

SONOMA, JULY 18, 1891.

OUR BIRTHDAY.

With this issue the INDEX-TRIBUNE enters upon its fourteenth volume. Like most country newspapers it had passed through the various vicissitudes of rural journalism when it came into possession of the present management nearly seven years ago, since which time its business and influence has been gradually built up, until at the present time, even though the paper is published in one of the smallest incorporated towns in the county, it has reached out all over Sonoma Township and enjoys a circulation and influence second to no country newspaper in the State, considering the size of its field. The INDEX-TRIBUNE in establishing a firm business hold in this community is not unmindful of the efforts of its many Sonoma Valley friends and patrons to assist the paper in every manner possible and to those friends and patrons is due in a great measure the prosperity of Sonoma's newspaper enterprise.

Of course in running a country newspaper one cannot please everybody, and that is why an effort was made to freeze the INDEX-TRIBUNE out two years ago by the starting of an opposition sheet, which after going a begging at \$1 per year for two years fizzled out after its promoters had sunk many thousands of dollars in the venture. During the opposition period the INDEX-TRIBUNE lost five subscribers and gained 155, thanks to its many Sonoma Valley friends who believe in upholding with substantial support a legitimate newspaper enterprise in their midst.

In commencing a new volume it will be the endeavor of the INDEX-TRIBUNE in the future as in the past to let the outside world know the capabilities of the soil and climate of Sonoma Valley, to guard the interests of taxpayers, expose the villainy of land speculators, and give all the local news. It bears malice to no one and will always be kind and true to its friends and generous to its enemies.

PARIS is laughing over a joke about an American inventor who is said to have patented an "electric corset" that is to bring about the reign of morality at once. If one of these articles is pressed by a lover's arm it at once emits a shriek like the whistle of a railway engine; and the inventor claims that he has already married three of his daughters, owing to the publicity thus thrust upon a backward lover.

A one-wheel cycle eight feet high that a greenhorn can learn to ride in a minute and then write his name in the dust with it in fifteen feet of space, not to mention a speed capacity of two miles in sixty seconds on a good track, is the astonishing invention which Victor Beranger of Worcester, editor of the *Courier de Worcester*, claims to have produced after two years of hard work.

A Serious Charge.

Saturday an old man named Jerry Murray, who lives near Sonoma, came to town. He drew nearly \$300 from a bank and paid it all but \$60 to parties he owed. Toward evening he fell in with Pierce Grace and Lee McKenney, who he claims went with him out to Beale's corner and relieved him of his cash. A Santa Rosa officer saw the old gentleman as he was escorted out of town by his interested friends and is quite sure they got the money. Warrants were sworn out against them and they were captured at Suisun Sunday where they had fled.—*Republian*.

The World Enriched.

The facilities of the present day for the production of everything that will conduce to the material welfare and comfort of mankind are almost unlimited and when Syrup of Figs was first produced the world was enriched with the only perfect laxative known, as it is the only remedy which is truly pleasing and refreshing to the taste and prompt and effectual to cleanse the system gently in the Spring time or, in fact, at any time and the better it is known the more popular it becomes.

Two remarkable old women live at Bainbridge, Ind. They are Lucinda McKee and Martha Ann Darnell. They are twins, 81 years old, look exactly alike, dress alike, were married within a year of each other, and were widows within three months of each other. Mrs. Darnell is the mother of fourteen children and Mrs. McKee of sixteen. They take a great interest in politics, attend the Baptist church together, weigh 160 pounds each, and are in good health and unusually energetic for their age.

EMBARCADERO.

Items of Interest from "Darby and Joan."

Mrs. Elizabeth Burris was in town Tuesday.

Mr. and Mrs. C. C. Wise were in town Sunday.

Mr. Wm. Thomas spent Sunday with friends in Shellville.

Mr. P. H. Vollmar went to the Bay City last Thursday.

Miss Kate Monahan of Sonoma is visiting friends at this place.

Miss Eva Prunty visited friends in Embarcadero on Wednesday.

Miss Carrie Green and Miss Belle Abern spent Wednesday in Lakeville.

We noticed Messrs. L. Dunn, H. Presswood and J. Tate on our streets Sunday.

Mr. L. Johansen with a force of men are pressing hay in this neighborhood.

The Board of Supervisors inspected the site for our new bridge last Monday.

Mrs. M. P. Akers and son of Shellville spent a few days of last week on Russian River.

The San Luis school opens next Monday with Miss C. Smythe of Santa Rosa as teacher.

Mr. and Mrs. Peter Stadelman of San Francisco spent a few days with their mother this week.

Miss Willie Akers of Shellville entertained her cousin, Miss Grace Lyon of Sonoma, last Sunday.

Miss Elsie Amos of Black Diamond, after a pleasant visit with relatives, has gone to San Francisco.

Mr. and Mrs. Donahue, accompanied by their sons Robert and Victor, have gone to Tomales to remain a short time.

Our industrious citizen, Mr. J. Pritchard, has commenced tearing down his old house and will erect a nice cottage in its stead.

The Whist Club played another very interesting game Wednesday evening. The unfortunate players who have lost the game a number of times were again defeated.

Nicholas ten Bosch of Locust Grove, the enterprising editor of the "Shellville Bay," has retired from his literary work, as he is about to take his departure for San Francisco. We wish him success in his future career.

DARBY AND JOAN.

Embarcadero, June 16, 1891.

BOARD OF SUPERVISORS

THURSDAY, July 9th.

In the matter of the change of road from Graham Canyon creek to the Bennett Valley road, said changes have been completed with a former order of the Board and satisfactory deeds have been furnished to the county for the entire right-of-way to the road and the same having been graded and fenced to the satisfaction of the road overseer of the district, Mr. Clark moved that the said change be accepted and declared a public highway and that a warrant be drawn in favor of C. A. Kennedy for \$500 to reimburse him for damages as provided by a previous order of the Board.

The road overseer of the district was ordered to replant the bridge at Board's Crossing on Dry Creek and a warrant was ordered drawn on the general fund to pay for the same.

On motion of Mr. Cady, the sum of \$2,735 was ordered transferred from the county general fund to the hall of records building fund, and \$8,589 from the county general fund to the new jail building fund.

Supervisor Sales, as road commissioner of the district, was authorized to cause to be constructed concrete abutments and piers for the protection and support of the Rainville bridge in Petaluma road district.

FRIDAY, July 10th.

The following resolution, introduced by Mr. Smith, was adopted by a unanimous vote: Whereas overtures have been made to this Board by the Board of Supervisors of Mendocino county toward the building of a bridge across the Gualala River on the county line between Sonoma and Mendocino counties at or near the crossing of the coast road, and whereas such a bridge is a public necessity, therefore, be it resolved that this Board will at its meeting in January, 1892, appoint viewers to view and locate a bridge site across said river at such point, and that at its meeting in February, 1892, (the Board of Supervisors of Mendocino county having assented thereto) the Board will advertise for bids to construct a substantial bridge upon the site that shall have been located; one-half the cost for building and locating said bridge to be borne by Mendocino county and one-half by Sonoma county.

TUESDAY, July 14th.

The Mill creek bridge having been completed according to the plans and specifications a warrant was ordered drawn in the sum of \$518 in payment for the same.

The reports of the various county officers were received and placed on file.

The report of the viewers appointed to view and lay out a public road in Santa Rosa and Fulton road districts, as prayed for by G. W. Davis and others, the matter was set for further hearing on August 4th.

Fishing in the Alleghenies.

Good trout fishing need not be expected this summer in the Blue Ridge and Allegheny mountains, for the recent heavy rains have played sad havoc with the fishy tribe. The rainfall in the south has been without precedent, and the mountain streams have filled the rivers and either scattered the trout or killed them by their being left on the lowlands and swamps by the receding waters. The same fate has befallen that game fish the black bass. Every river south of Baltimore and Washington has been overflowing its banks continuously for the past two months. Long continued spring freshets are disastrous to the fish. On the other hand, all kinds of game in the south have wintered nicely. Bob White is likely to be in great abundance next fall.—*Harpers Weekly*.

His Kindness Caused His Death.

Frequently a man loses his life while rising in the performance of a deed of bravery and daring, but it is seldom that life is sacrificed in the mere performance of a kind deed. But it is thought the death of John N. Ames, formerly of Camden, which occurred in Detroit recently, was caused in this way. He took a sick, friendless boy from the street into his office, wrapped him in his own overcoat, and notified the authorities, who took the boy to the hospital, where he soon died of malignant diphtheria. Mr. Ames was soon taken by the same disease and died.—*Rockland (Me.) Courier Gazette*.

King Otto, Bavaria's crazy sovereign,

is physically healthy, but he is attended with voluntary starvation in consequence of his frequent refusals to eat for two or three days. Occasionally he becomes violent, is imprisoned in a padded cell, and exhausts himself by shouting and trying to tear down the iron bars of the window. Sometimes he is the victim of an uncontrollable fear of cats, and refuses to step on one lest he might plunge into the flames which he imagines yawns before him.

A new electric thermostat, for use in ships' bunkers and refrigerating rooms, has lately appeared. The special feature is a steel bulb enclosed in a frame having a set screw which can be altered so as to bring the mercurial column to a platinum contact wire exactly at the desired temperature.

William J. Haines, who has just been mustered in by the Frank P. Blair post, G. A. R., of St. Louis, is 103 years old and a veteran of three wars. He is said to be the oldest Union soldier in the country.

Changes of Climate.

Killmore people are generally happy. Partly is this due to the fact that the population is relatively small, and among our rugged population seeking new homes in those portions of the West, and where industrial life is not yet established, the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against malaria, a variable temperature, and the ability to deal with the heat, but is also having a tendency to moderate the climate, and to make the change of climate, great and water which that change necessitates, is that of the St. Lawrence, which not only favors the system against SONOMA INDEX - TRIBUNE.

SATURDAY, JULY 18, 1891.

"Wait in the Hall."

The author of "England, Without and Within," gives an anecdote of an easy going English gentleman who was not bound by the absurd law against parcel carrying.

A shoemaker had mislaid to him a pair of shoes intended for a neighbor, and had probably sent to the neighbor the shoes that should have been sent to him. As he had no prejudice against carrying bundles he went with the shoes to his friend's house.

On arriving at his friend's door he asked to see Mr. Dash, but was understood by the servant to ask for Mrs. Dash, and was ushered into her presence. The lady, who had never seen him before, looked up and curiously asked:

"What have you there?"

"Mr. Dash's shoes," replied the gentleman.

"Oh, yes; it's all right. Mr. Dash is out, but he'll be in soon, and if you want to see him you'd better take a seat in the hall and wait till he comes."

"But, madam," began the gentleman, who was a baronet's son.

"Never mind, never mind; it's all right. Step out in the hall, please, and wait for Mr. Dash."

The gentleman, of course, appreciated the situation at once. But he was too well bred and had too keen a sense of humor to explain, which would have both mortified the lady and prevented him from enjoying his mistake. He stepped into the hall, intending to give the shoes to a servant and leave the house.

But meeting his friend coming in, he gave him the shoes and, after a few words, bade him good morning. Though pressed to remain, he refused, knowing that his return to the wife's presence would cause her embarrassment.

His consideration for the feelings of another person would have made him a gentleman if he had been a hodgeknave.

Formality in the Korean Army.

In battle Korean generals are always accompanied by their servants. When he rides on horseback, a general has a servant on each side of his horse to hold him in position, and a third stands at the horse's head to hold the animal during the fight, or to lead it to the advance or retreat.

These servants accompanied General Han to the gate of the king's audience hall. They left him there, and he walked alone across the yard, with his head bent and his sword held toward the ground. He walked softly on the steps at the left leading into the room in which his majesty the king of Korea stood, bent down on all fours and bumped his head before him as a sign of the reverence he felt for his king.

Then, rising, he stood, with his sword uplifted, at the right of the king, while his audience took place. At the close of the audience he bowed, and so continued till outside the gate, where he again sprang into greatness, and had a whole host of servants to do him homage.

This oriental formality runs through all ranks of the Korean army. It is the rule of the service. Korea will never have good soldiers until the officers learn military tactics by the same hard knocks that our officers do, and until they put themselves more on a level with their troops, and work with them.—Frank G. Carpenter in Youth's Companion.

Animals and Earthquakes.

The effect of volcanic phenomena on the lower animals has often been the subject of discussion. The records of the most great earthquakes refer to the consternation of dogs, horses, cattle and other domestic animals. Fish and other aquatic creatures are also much disturbed at such times. In the London earthquake of 1749 thousands of fish in the canal showed evident signs of confusion and fright. During the Tokio earthquake of 1880 cats inside of houses ran about trying to escape, foxes barked and horses tried to tear down the stable which confined them. There can, therefore, be no doubt that animals know that something unusual and terrifying is taking place.

More interesting than these are the observations showing that nearly all classes of animals are agitated just before an earthquake takes place. Horses and ponies have been known to prance round in their stalls in an uneasy manner, pheasants to scream and frogs to cease croaking suddenly just before a shock, as if aware of its coming. The Japanese say that moles show their fear at such times by leaving their burrows before the shock takes place, the presence of four or five of the little creatures on the surface in a garden being sufficient to cause a panic.—St. Louis Republic.

Universal Brick Press.

A machine has been designed for making bricks and tiles on the semi-process. The clay or material to be formed into bricks is fed into a hopper in a loose and granulated state. The finish is delivered as the charger returns to refill the empty mold. Each brick receives four distinct presses, whereby the air is thoroughly expressed. All the labor required is one man to tip the clay into the grinding pan, and one boy to take off the bricks as the machine delivers them.

Among the various purposes for which this machine is employed, besides brick and tile making, are the forming of purple ore, or "blue billy," into briquettes for the smelting furnace, the forming of nickel oxide into cakes for the assaying furnace, the forming of dry cement compound into blocks ready for clinking, and the pressing of coal and coke briquettes.—New York Commercial Advertiser.

Forgot to Carry.

A township treasurer in Ohio forgot to carry "9" in adding up his accounts, and the committee to look over his books found him \$7.50 short, and nearly broke up his family before it was discovered where the error lay. The surprising thing about it is that he didn't "carry" the whole bundle of 9's or some where else.—Detroit Free Press.

For Dry Goods, Clothing, Groceries, Hardware, Cutlery, and also everything kept in a general merchandise store go to S. Schocken's north side Plaza.

Footprints of the World's History.

It is a relief to pick up a new book that is at once thrilling, romantic, wholesome, pure, and true. Such a work is "Footprints of the World's History," the latest and greatest work of the two celebrated historians, John Clark Ridpath and Wm. Bryan. These distinguished gentlemen, having won their laurels by independent writings, co-operated on this work, and produced a gem "of the purest ray serene." It is not a dry, uninteresting statement of the plain facts, but rather each of the most important events of history has been taken up and described by a master of language, who holds the reader entranced as he winds his way along the path of history, following carefully in the footprints of progress.

We are delighted with this superb volume. Perfect in thought, superb in style and magnificent in execution. The bindings are sumptuous, as are also the many illustrations and colored plates. The publishers have rightly concluded that such a gem should have a rich setting.

It is a valuable addition to literature. It is a book for the old as well as the young; the married as well as the single; the gay as well as the grave. Everybody will read it with equal eagerness and profit. It is sold only through agents, and the publishers' advertisement appears in another column.

Consumption Cured.

An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of Consumption, Bronchitis, Asthma and all throat and lung affections, also a positive and radical cure for Nervous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, he has felt it his duty to make it known to his suffering fellow-men. Actuated by this motive and a desire to relieve human suffering, I will send free of charge to all who desire it, this receipt in German, French or English, with full directions for preparing and using. Sent by mail by addressing with stamp, naming this paper, to A. J. Tower, 530 Powers Block, Rochester, N. Y.

A Little Girl's Experience in a Light-house.

Mr. and Mrs. Loren Prescott are keepers of the Gov. Light-house at Sand Beach, Mich., and are blessed with a daughter, four years old. Last April she was taken down with Measles, followed by a dreadful Cough and turning into a fever. Doctors called and at last declared her, but in vain, she grew worse rapidly, until she was a mere "bundle of bones." Then she called for King's New Discovery, and after the use of two and a half bottles, was completely cured. They say Dr. King's New Discovery is worth its weight in gold, yet you can get a trial bottle free at Ed. Wagner's Drugstore.

Backlen's Arnica Salve.

The best salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by E. Wagner, Druggist.

MISCELLANEOUS.

"August Flower"

For two years I suffered terribly with stomach trouble, and was for all that time under treatment by a physician. He finally, after trying everything, said stomach was about worn out, and that I would have to cease eating solid food for a time at least. I was so weak that I could not work. Finally on the recommendation of a friend who had used your preparation, I procured a bottle of August Flower, and commenced using it. It seemed to do me good at once. I gained in strength and flesh rapidly; my appetite became good, and I suffered no bad effects from what I ate. I feel now like a new man, and consider that August Flower has entirely cured me of Dyspepsia in its worst form. JAMES E. DEDBRICK, Saugerties, New York.

W. B. Utsey, St. George's, S. C., writes: I have used your August Flower for Dyspepsia and find it an excellent remedy.

TURKEYS FOR SALE.

A fine flock of forty young turkeys about half grown for sale cheap. Apply at this office.

PRISON REMEDY FOR CATARRH.

IT IS THE BEST, EASIEST TO USE, & THE CHEAPEST.

For Dry Goods, Clothing, Groceries, Hardware, Cutlery, and also everything kept in a general merchandise store go to S. Schocken's north side Plaza.

MISCELLANEOUS.

THE COWBOY KNOWS!

THE COW-BOY SUGHT TO KNOW!

Trying to hold a drove of cattle together in a driving rain means an amount of exposure which few can withstand without serious results. If it does not follow, it will be found that such hardships usually bring on rheumatism and similar complaints. At such times a "Fish Brand Slicker" is worth its weight in gold, and is invaluable to any one exposed to such weather. It is made of the entire saddle, ponies, and cattle dry, and completely envelopes the rider from head to foot. It can't get wet, whatever the weather. And, besides, it keeps him warm. Don't accept any inferior imitation; every garment stamped with "Fish Brand" Trade Mark. Don't accept any inferior coat when you can have the "Fish Brand Slicker," delivered within a few days. Particulars and illustrated catalogue free.

A. J. TOWER, - Boston, Mass.

IXL COMPOUND.

The Greatest Insecticide and Fungicide.

Is scale injuring your trees and disfiguring your fruit?

Is the mildew threatening your grapes and vines?

Is the curl leaf making your trees weak and leafless?

Are your pears and apples wormy and hideous to sight?

Are the blossoms dropping and trees losing their fruit?

Then use for the Destruction and Prevention that wash which can be as effectively applied in summer as in winter, the

THE BRAVEST 500 OF '61.

A Wonderful Book made from the records of the War Department.

OF THE 2,787,301 MEN ENLISTED IN THE UNION ARMY DURING THE WAR OF 1861-65, A LITTLE LESS THAN 500 WERE SPECIALLY RECOGNIZED BY THE WAR DEPT. AS COMING UNDER THE ACT OF CONGRESS, JULY 10, 1862, FOR DISTINGUISHED BRAVERY.

Many of the stories told by the heroes themselves, of how they won the high distinction are extremely interesting. That the records of these deeds are almost unknown to the general public, but to be buried in the pigeon holes of the War Dept. and in the recesses of their own breasts, seems astonishing.

This book must find a wide sale, for it is full of incidents that will interest every old soldier in the land, and our boys will glory in it. It is a volume of over 500 pages, with nearly 100 excellent illustrations, and is especially for the war.
